

NOTES TO USERS

This map is for use in the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources or small flows. The community map repository should be used to determine if an area is in a flood hazard zone. To obtain more detailed information in areas shown as Base Flood Elevations (BFEs) and/or Floodway Areas, users are encouraged to consult the Flood Insurance Study (FIS) report that accompanies this FIS. Users should be aware that BFEs shown on the FIS represent the predicted water surface elevation of floodwaters during a 1% annual chance flood event. They do not represent the actual water surface elevation during a flood event. Floodway Areas shown on the FIS represent the predicted water surface elevation of floodwaters during a 1% annual chance flood event. They do not represent the actual water surface elevation during a flood event. The FIS report should be used in conjunction with the FIRMs for purposes of construction and/or floodplain management.

Boundaries of the Floodway Areas are based on unadopted and unapproved regulations and/or other information. The Floodway Areas shown on this map are for informational purposes only and are not intended to be used for regulatory purposes. Floodway Areas shown on this map are not intended to be used for regulatory purposes. Floodway Areas shown on this map are not intended to be used for regulatory purposes. Floodway Areas shown on this map are not intended to be used for regulatory purposes.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures. Refer to Section 2.4 Flood Protection Measures of the FIS report for information on flood control structures for this jurisdiction.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. Flood elevations on this map are referenced to the North American Vertical Datum of 1988. Flood elevations on this map are referenced to the North American Vertical Datum of 1988. Flood elevations on this map are referenced to the North American Vertical Datum of 1988.

To obtain current elevation, description, and/or location information for bench marks shown on this map, please contact the National Geospatial Intelligence Agency (NGA) at (301) 713-3242, or visit the website at <http://www.nga.mil>.

Base map information shown on this FIR is derived from Newnan County aerial photography produced as of 1/10/00 from photography dated 2006. Please refer to the separately printed Map Index for an overview map of the county showing the location of map sheets. Community map repository addresses include previously issued letters of Map Change. A Flood Insurance Study Report, obtained directly from the FIS website.

If you have questions about this map, how to order products or the National Flood Insurance Program in general, please call the FEMA Map Information Center at (877) 352-2627 or visit the FEMA website at <http://www.fema.gov/business/fip>.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

- Zone A: 1% Annual Chance Flood
- Zone B: 1% Annual Chance Flood
- Zone C: 1% Annual Chance Flood

FLOODWAY AREAS IN ZONE AE

- Zone AE: Floodway Area

OTHER FLOOD AREAS

- Zone D: Floodway Area
- Zone E: Floodway Area
- Zone F: Floodway Area
- Zone G: Floodway Area
- Zone H: Floodway Area
